HTML Basics - II

HTML text formatting

→ Several elements for defining text with a special meaning

Eg   <b> - Bold text
     <strong> -. Important text
     <i> - Italic text
     <em> - Emphasized text
     <mark> - Marked text
     <small> ~ smaller text
     <del> → deleted text
     <ins> → inserted text

<u> → underline
<sub> → subscript
<sup> → superscript

Tables ──→ <table>

<th> ←	Sub	Sem 1	Sem 2	← <thead> table heading
<tr> → row	Eng	2	5	Actual content <tbody>
	Hin	6	9	
	Mth	10	12	
	Total	18	26	table footer <tfoot>

(i) <table> → table tag
(ii) <tr> → table row
(iii) <td> → table data
(iv) <th> → table heading (bold)

To add Border :- (From CSS)

<style>

table, tr, td, th {

border : 1px solid Black;

border - collapse : collapse;

</style>

forms in HTML :

```
<input type = "text"> For text
<input type = "radio"> For radio
<input type = "checkbox"> For checkbox
<input type = "password"> For password
```

```
<label for = "user"> username :</label>
    <input type = "text" name = "user">
        ↳ username : [            ]
```

→ <label> is used for the text related to the type we
are using for input.

```
< form action = "https:.....">
```
↑ when button is clicked this action
is performed

```
<input type = "submit" value = "submit">
```
submit Button Creation → value/text
inside button
